EXPLANATORY NOTES

Market Value and Volume of Sales on Registered and Exempted Securities Exchanges

The data presented in this table are of two types depending upon the method of aggregation used by each exchange. Reports of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearances occur for the most part within five days of the execution of a trade. Reports for other exchanges cover transactions effected on trade dates falling within the report month. The variance introduced by these two different methods of aggregating the data is not considered to be significant and accordingly all registered exchanges are aggregated and reported in monthly summaries.

Stock data include voting trust certificates, certificates of deposit for stocks and American Depository Receipts for stocks.

Bond data have excluded transactions covering United States Government issues since March 1944.

Warrants data include trading in rights for all periods prior to January, 1972.

NOTE: SEE EXPLANATORY NOTES FOR OFFERINGS TABLES.

EXPLANATORY NOTES FOR OFFERINGS TABLES

1971 TO PRESENT 1/

The data included in the Commission's statistical series on securities offerings are a sample of the universe of all securities offered in the United States. This sample includes all primary security issues registered with the Commission for immediate cash sale to the public pursuant to the requirements of the Securities Act of 1933 or Regulation A of that Act. The sample also includes information collected by the Commission on certain private placements as described below. Excluded from the offerings data are all offerings not greater than \$100,000; all debt securities with terms of less than one year; all secondary offerings; all non-cash offerings; issues withdrawn after effective registration; issues not defined as securities under Section 2(1) of the Securities Act of 1933; offerings--both public and private--by issuers whose securities are exempted under Sections 3(a)(2)-3(a)(6) and Section 3(a)(11) of the Securities Act of 1933 2/; all employee stock plans; investment company issues other than closed-end shares 3/; intracorporate securities transactions; and sales to foreign purchasers.

The source of data for registered offerings is the registration statement filed with the Commission by the issuer of the securities. (Registration data and offering data are not directly comparable because, beyond the exclusions noted above, the registration date and the offering date may fall in two different monthly or yearly periods.) Data on private placements are collected by a Commission survey of 39 life insurance companies on a monthly basis and 9 more on a quarterly or semi-annual basis, and by reports of private placements filed on the Commission's Form 8-K. Life insurance companies surveyed by the Commission had assets on December 31, 1972, of \$190,145 million, or 79% of all life insurance company assets. Only those private placement commitments which are actually executed are included in the statistics. No representation is made that the private placement activity of the life insurance companies surveyed approximates private placement activity as a whole in the United States.

The offerings tables make a distinction between Corporate Offerings and Foreign Government Offerings. It should be noted that Corporate Offerings include issues by non-corporate business enterprises such as limited partnerships, and that the Foreign Government classification includes foreign government issues of all levels, foreign government agencies, and foreign government-owned enterprises.

The industry classification used in the offerings tables should be self-explanatory for the most part. It should be emphasized that the Communication group includes telephone utilities. In the period 1971-73, 98% of the dollar value of the registered issues in this category was accounted for by telephone utilities. The Commercial and Other industry group is comprised of agriculture, construction, wholesale and retail trade, and all service activities other than financial services.

The security types used in the offerings tables are Bonds, Preferred Stock and Common Stock. The Bonds group includes convertible bonds, which are detailed on a special table. The Preferred Stock group includes convertible preferred stock; however, in the period 1971-73 registered convertible preferred stock accounted for less than 15% of the value of all registered preferred stock. The Common Stock category includes common shares issued by closed-end investment companies (preferred shares are included in Preferred Stock), as well as securities issued by non-corporate business such as certificates of participation and shares of beneficial interest, and other equity securities such as voting trust certificates and certificates of deposit. American Depository Receipts are not included in the offerings statistics.

All figures are subject to revisions as new information becomes available which requires either an addition to or a correction to data previously published. Revised figures will be indicated with an "R".

-
- 1/ Explanatory notes applicable to the offerings data prior to 1971 may be found in Volume 33, pages 45 and 46, of the Statistical Bulletin. The major difference between the pre- and post-1971 data is that until 1971 the securities cited in footnote 2 were included in the offerings statistics.
- 2/ 3(a)(2) exempts domestic government issues and bank issues,
 3(a)(3) exempts securities arising out of current transactions with a maturity not exceeding 9 months,
 3(a)(4) exempts securities issued by non-profit and/or charitable groups,
 3(a)(5) exempts issues by savings and loan associations,
 3(a)(6) exempts issues by companies regulated by the ICC, and
 3(a)(11) exempts intrastate offerings.
- 3/ No investment company shares are included for 1971 and 1972; closed-end investment company shares only are included for 1973. The Commission plans to revise the offerings data to include closed-end shares for the years 1971 and 1972, and when this project is completed, revised tables will be published in the Statistical Bulletin.

Note: See Explanatory Notes for Registrations

EXPLANATORY NOTES

Registrations

Data cover all registrations which became effective under the Securities Act of 1933 during the period covered. Issues are included as of the effective date, with the exception of those subject to post-effective amendment to report terms of offering. These are included as of the date of the post-effective amendment.

The classification primary corporate offerings refer to registered offerings for immediate cash sale where the proceeds of the offering are at the disposal of the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for both type offerings is based generally on the initial offering price. The classification unseasoned common stock includes initial offerings by companies registering common stock for the first time under the Securities Act of 1933, whereas seasoned common stock offerings are registrations by companies previously having securities registered under the 1933 Act. Other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities.

Issues to be offered for extended cash sale include investment company issues, and all offerings of employee savings and stock option plans. The classification foreign government is shown separately, whereas registrations by foreign corporations are included in with corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings. Closed-end securities are included in primary corporate offerings.

Issues registered for other noncash purposes such as exchange transactions, securities given for property or services, or reserved for conversion are generally valued at the current market prices.

In order to eliminate double counting, the number of issues are shown for primary and secondary offerings only. However, effective registrations cover all cash offerings, noncash offerings, and offerings for extended cash sale.

Dollar amounts have been rounded and will not add to totals.

WORKING CAPITAL OF NONFINANCIAL U.S. CORPORATIONS
September 30, 1974

The net working capital of nonfinancial U.S. corporations rose \$6.2 billion in the third quarter of 1974. This gain in working capital compares with \$4.2 billion in the previous quarter and \$4.2 billion a year earlier. A measure of corporate liquidity, the current ratio (the ratio of total current assets to total current liabilities), was 1.61 in the third quarter of 1974, little changed from 1.62 in the previous quarter as compared to 1.65 a year earlier. Net working capital, which represents corporate investment in current assets in excess of current liabilities, totaled \$263.6 billion at the end of September, 1974.

Total current assets increased \$22.7 billion in the third quarter of 1974. Inventory investment accounted for \$13 billion of this increment. In addition, trade notes and accounts receivable rose \$5.4 billion; other current assets increased \$2.3 billion, and receivables from the U.S. Government gained only \$0.1 billion. Also on the asset side, holdings of cash and U.S. Government securities increased \$1.7 billion and \$0.3 billion, respectively. The ratio of these two items combined to total current liabilities--a frequently used measure of corporate liquidity--was .17 for the 1974 July-September period, the same as in the previous quarter, and compares with .19 a year earlier.

On the liabilities side of the balance sheet, total current liabilities increased \$16.6 billion in the third quarter of 1974. Half of this increment represented the gain in notes and accounts payable. Also, other current liabilities and Federal income tax liabilities increased \$4.9 billion and \$3.1 billion, respectively, while advances and prepayments by the U.S. Government rose \$0.4 billion.

Manufacturing corporations enhanced their working capital by \$5.7 billion in the third quarter of 1974. This increase by the manufacturing sector accounted for nearly 92 percent of the gain in the net working capital of all U.S. nonfinancial corporations. The retail and wholesale trade industries recorded a combined increase in net working capital of \$1.1 billion, while the remaining industries showed a net decline of \$0.6 billion.

Besides the \$6.2 billion added to corporate working capital in the July-September period, nonfinancial U.S. corporations invested about \$27 billion in additions to plant and equipment within the United States and approximately \$9 billion in other noncurrent assets including residential structures and fixed assets of foreign subsidiaries. To finance these investments, these corporations realized approximately \$19 billion from internal sources--depreciation and retained earnings--or approximately

44 percent of the required funds compared with nearly 62 percent a year earlier. They raised \$4.3 billion through net new securities financing--sales minus retirements--all of which were from net sales of debt securities. Stock issues were totally offset by retirements. The balance of the financing, nearly \$19 billion, was provided by long-term bank and mortgage loans and other miscellaneous sources.

Technical Notes

1) Year-end data for this series are based on Statistics of Income data through 1970, which cover virtually all corporations in the United States. Statistics of Income data may not be strictly comparable from year to year because of changes in the tax laws, basis for filing returns, and processing the data for compilation purposes. All interim quarterly data and year-end estimates after 1970, are based on data compiled from many different sources, including data on corporations registered with this Commission.

2) The item, cash on hand and in banks, includes time certificates of deposit.

3) The item, U.S. Government securities, includes Federal agency issues.

4) Receivables from and payable to the U.S. Government do not include amounts offset against each other on corporations' books or amounts arising from subcontracting which are not directly due from or to the U.S. Government. Wherever possible, adjustments have been made to include U.S. Government advances offset against inventories on corporations' books.

5) The item, other current assets, includes marketable investments (other than Government securities and time certificates of deposit) as well as sundry current assets.

6) The current ratio is total current assets to total current liabilities.

7) The quick ratio is the summation of cash and U.S. Government securities to total current liabilities.

8) Figures are rounded and will not necessarily add to totals.

The accompanying table contains the aggregate estimates of current assets and current liabilities of nonfinancial U.S. corporations.

NOTE: Includes funds of corporations, unions, multiemployer groups, and nonprofit organizations; also deferred profit sharing plans. Figures may not add to totals because of rounding.

STOCK TRANSACTIONS OF SELECTED FINANCIAL INSTITUTIONS
AND FOREIGN INVESTORS, FIRST THREE-QUARTERS OF 1974

During the first three-quarters of 1974, private noninsured pension funds, open-end investment companies, life insurance companies and property-liability insurance companies purchased \$20.9 billion of common stock and sold \$19.4 billion, resulting in net purchases of \$1.5 billion. For the same period in 1973, purchases were \$33.8 billion; sales, \$29.6 billion; and net purchases, \$4.1 billion. Their common stock activity rate ^{1/} was 18.9 percent versus 22.8 percent a year earlier.

Private Noninsured Pension Funds

Purchases of common stock by private noninsured pension funds fell from \$14.6 billion for the first nine months of 1973 to \$9.1 billion in 1974, while sales declined from \$11.3 billion to \$7.5 billion. Therefore, net purchases dropped from \$3.3 billion to \$1.7 billion, the smallest net accumulation of common stock since the first three-quarters of 1964. Their common stock activity rate declined from 16.8 percent to 14.5 percent.

Open-End Investment Companies

For the period January-September, mutual funds purchased \$7.0 billion of common stock and sold \$7.5 billion, yielding net sales of \$0.6 billion. Purchases for the same period in 1973 were \$11.3 billion; sales were \$13.3 billion; and net sales were \$2.1 billion. Their common stock activity rate was 30.0 percent, down from 38.0 percent a year earlier.

Life Insurance Companies

During the first three-quarters of the year, purchases of common stock by life insurance companies for their general accounts were \$1.2 billion as compared to \$2.2 billion the year before; sales were \$1.0 billion versus \$1.4 billion in 1973. As a result, net purchases for the initial three-quarters of the year declined from \$0.9 billion to \$0.2 billion, and the activity rate fell from 19.0 percent to 13.7 percent.

For their separate accounts, life insurance companies purchased \$1.6 billion of common stock and sold \$1.0 billion, resulting in net purchases of \$0.6 billion. A year earlier, purchases were \$2.4 billion; sales, \$1.6 billion; and net purchases, \$0.8 billion. Their common stock activity rate fell from 32.2 percent to 24.2 percent.

^{1/} Activity rate is defined as the average of gross purchases and sales divided by the average market value of holdings. Activity rates used throughout this report are expressed as annual rates.

Property-Liability Insurance Companies

Purchases of common stock by property-liability insurance companies dropped from \$3.2 billion for January-September of 1973 to \$1.9 billion in 1974, while sales rose from \$2.0 billion to \$2.4 billion. ^{2/} Thus, property-liability insurance companies changed from a net purchaser of \$1.2 billion to a net seller of \$0.5 billion, while their activity rate was 19.0 percent for the first three-quarters of both years.

Foreign Investors

During the initial three-quarters of 1974, foreign investors purchased \$5.8 billion of corporate stock and sold \$5.3 billion, netting \$0.5 billion in additional holdings. For the same period in 1973, they made purchases of \$9.0 billion, sales of \$6.7 billion, and net purchases of \$2.3 billion.

Block Transactions on the New York Stock Exchange

Block trading on the NYSE, transactions involving 10,000 or more shares, is considered an indicator of institutional trading. Through September of 1974, block transactions amounted to \$9.1 billion as compared to \$16.0 billion a year earlier. This decline of 43.1 percent in block trading compares to a decline of 27.2 percent for total dollar volume on the NYSE. Even after adjusting for changes in the average value per share traded, block trading fell 26.5 percent versus a drop of only 10.8 percent for total share volume on the NYSE.

^{2/} Third-quarter sales were \$1.2 billion, the largest recorded since our series began in 1964, and accounted for almost one-half of total sales for the first nine months of 1974.

EXPLANATORY NOTES

Over-the-Counter Volume in Exchange Stocks

The volume of over-the-counter trading in exchange stocks (sometimes referred to as the "third market") is based on reports received from broker-dealers pursuant to Rule 17a-9 of the Securities Exchange Act which became effective on January 4, 1965 and was revised on April 1, 1967.

Rule 17a-9 requires that broker-dealers who make over-the-counter markets in common stocks traded on the New York Stock Exchange report quarterly their total third market sales of such stocks in which they make markets. They are also required to report certain over-the-counter sales of such stocks in which they do not make markets, as defined in the Rule. In addition, other broker-dealers must report any third market sales which amount to \$25,000 or more if no other broker-dealer intervened in the transaction. The reporting system is designed to reflect all sales to (or purchases by) persons other than broker-dealers, excluding inter-dealer transactions. Over-the-counter volume shown in the tables, therefore, represents sales to individuals and institutions. Secondary distributions and other syndicated offerings are excluded.

Broker-dealers who make markets in New York Stock Exchange common stocks are required to show separately any over-the-counter purchases and sales which involve members of the New York Stock Exchange. These transactions are made pursuant to Rule 19b-1 of the Securities Exchange Act and New York Stock Exchange Rule 394(b) which both became effective November 7, 1966. These sales are included with total over-the-counter sales.

In comparing total third market sales with New York Stock Exchange volume, it should be noted that exchange volume includes preferred as well as common stocks and also includes sales to specialists and other exchange members as well as sales to the public. Member trading on the New York Stock Exchange generally amounts to about 25% of total trading. In comparing third market volume and exchange volume in any given stock, it should be noted in addition that third market volume includes odd-lot transactions whereas exchange volume for individual stocks, as reported by the New York, the Midwest and the Pacific Stock Exchanges, does not include odd lots.

The 50 New York Stock Exchange stocks for which third market volume is shown were selected on the basis of their continuing high activity in the third market. The list of stocks is subject to change from time to time.
